Education

PES University

Bachelor of Technology in Computer Science Engineering

2025 – 2029

Bengaluru, India

Mahesh PU College

Pre-University Education, Karnataka Board

2023 – 2025

Bengaluru, India

VVS Sardar Patel High School

SSLC, Karnataka Board

Graduated 2023

Bengaluru, India

Projects

NetPay | Kotlin, Firebase

[GitHub](#)

- Built an Android-based peer-to-peer expense management application for real-time shared financial tracking
- Implemented Firebase Authentication and cloud-based synchronization for secure multi-user workflows
- Designed scalable expense handling architecture with efficient real-time database updates
- Focused on responsive UI and seamless cross-user expense management experience

Examino | Python, HTML, CSS, JavaScript

[GitHub](#)

[Live Demo](#)

- Developed a local-first MCQ generation engine using PDF parsing and LLM-assisted question generation
- Implemented adaptive difficulty logic based on user performance and response accuracy
- Built structured pipelines for extracting, processing, and generating quiz datasets from educational material
- Designed a lightweight interface for quiz generation, storage, and interaction

PESUflow | Kotlin

[GitHub](#)

- Created an Android utility application that filters and restructures PES University notifications
- Parsed HTML announcements and categorized updates using user-defined filtering systems
- Reduced notification clutter by prioritizing relevant academic and administrative announcements
- Improved accessibility and usability of campus-related updates through streamlined delivery

Skills

Languages: Python, C, Kotlin, TypeScript, JavaScript, HTML, CSS

Technologies & Tools: Firebase, Git, GitHub, Vercel, VS Code, Matlab

Design: Figma, Photoshop, Canva
